Relevant Experience

Night Auditor (PM IT Systems Support)

Holiday Inn

New York, New York
Sept 2025 – Mar 2026

- Worked independently as the sole overnight point of contact for escalated technical support, troubleshooting Opera PMS (Oracle Hospitality) issues, installs, and upgrades and completing end-of-day financial reconciliation.
- Wrote standardized procedures and training documentation during the Opera PMS platform migration, a process improvement that reduced onboarding time for front desk staff.

Growth & Go-to-Market Analyst Intern

Leagueswype

Remote
Aug 2025 – Jan 2026

- Built automated acquisition dashboards and NLP-optimized engagement pipelines across TikTok, Instagram, and Meta, driving 500K+ views, 1K+ followers, and 250 early-access signups.
- Scoped and executed the GTM data infrastructure for an AI product launch, building automated pipelines on Reddit, X, and Discord that converted community activity into qualified signups.

Information and Technology Support Specialist

BU Metropolitan College IT

Boston, Massachusetts
Aug 2024 – May 2025

- Resolved 100+ customer support tickets end to end in ServiceNow across hardware, software, and network issues for 500+ faculty, staff, and students, reducing average resolution time by 15%.
- Traced root causes of recurring issues across desk-side and phone support on Windows, macOS, and Microsoft 365, documenting 35+ standardized solutions that improved first-contact resolution and cut escalations while meeting sub-24 hour SLAs.

Information and Technology Consultant (IT Field Technician)

BU College of Engineering IT

Boston, Massachusetts
Sept 2022 – Jan 2024

- Delivered customer-facing technical support for 1,000+ students, faculty, and staff, troubleshooting hardware, software, and network issues across Windows, macOS, and research workstations.
- Trained new hires on the team's ticket workflow and on documenting resolutions in a shared OneNote knowledge base, which kept fixes consistent across the team.

Technical Projects

Editor AI | Python, JavaScript, Next.js, REST APIs, Firebase

Sept 2024 – Jan 2025

- Built an AI chatbot for hyper-local news sites with a client, a former Boston Globe editor, adding grammar and spelling correction, automated headline generation, and research source identification.
- Turned a Figma design into a working Next.js web app, first connecting the front end to the backend through a REST API and later migrating to Firebase, with Meta Llama powering the chatbot.

MAPLE Bill Summarization and Tagging | Python, SQL, API Integration

Jan 2025 – May 2025

- Led backend development on a multidisciplinary team building bill summarization and tagging to improve legislative transparency.
- Integrated the Massachusetts Legislature Public API using object-oriented Python to pull bill data and improve the accuracy of LLM-generated summaries.

Fintech Web Application | Fintech Focus, JPMorgan Chase Cohort | Python, Flask, HTML, CSS |

Jun 2021 - Aug 2021

- Built a full-stack web app in Python and Flask with a MongoDB backend and an HTML and CSS front end, delivering an MVP to JPMorgan Chase recruiters with a team of interns.
